# Meeting Notice:

## Community Advisory Committee
## August 29, 2005

*August 2005*

## Meeting to Discuss Traffic Studies being Conducted for the Environmental Analysis

The San Francisco Department of Public Works in partnership with the San Francisco Planning Department invites you to attend the Ad Hoc Community Advisory Committee Meeting for the Bayview Transportation Improvements Project.

The meeting will focus on the traffic studies that will be used in the environmental analysis. The project team will present the following information:

- Status update--technical studies underway;
- Traffic studies--existing conditions analysis, including traffic and parking;
- Next steps—incorporating results of technical studies in the environmental review; and
- Review of schedule and environmental process.

**Date: Monday, August 29, 2005**

**Location:**

**Southeast Community Facility**
Alex Pitcher Community Room,
1800 Oakdale Avenue,
San Francisco, CA

**Time: 5:30pm to 6:30pm**

*See above for agenda items.*

## Status Update

The Ad Hoc Community Advisory Committee met on June 27, 2005 to discuss the proposed truck route alternatives for the Bayview Transportation Improvements Project. Based on community and stakeholder input, and preliminary data, three (3) southern and two (2) northern truck route alternatives will be further analyzed in the environmental review, which is the next phase of the project. The existing but unsigned truck route will also be analyzed in the upcoming environmental analysis.

# Meeting to Discuss Wetlands and Biological Resource Data for BTIP's Environmental Analysis

The San Francisco Department of Public Works in partnership with the San Francisco Planning Department invites you to attend the Ad Hoc Community Advisory Committee Meeting for the Bayview Transportation Improvements Project (BTIP).

≡ Agenda

The meeting will focus on biological resources and wetlands. Agenda items include:

- Status update--technical studies underway;
- Wetlands delineation study results;
- Biological resources technical study
- Next steps—incorporating results of technical studies in the environmental review; and

**Date: Monday, October 24, 2005**

**Location:**

**Southeast Community Facility**
Alex Pitcher Community Room,
1800 Oakdale Avenue,
San Francisco, CA

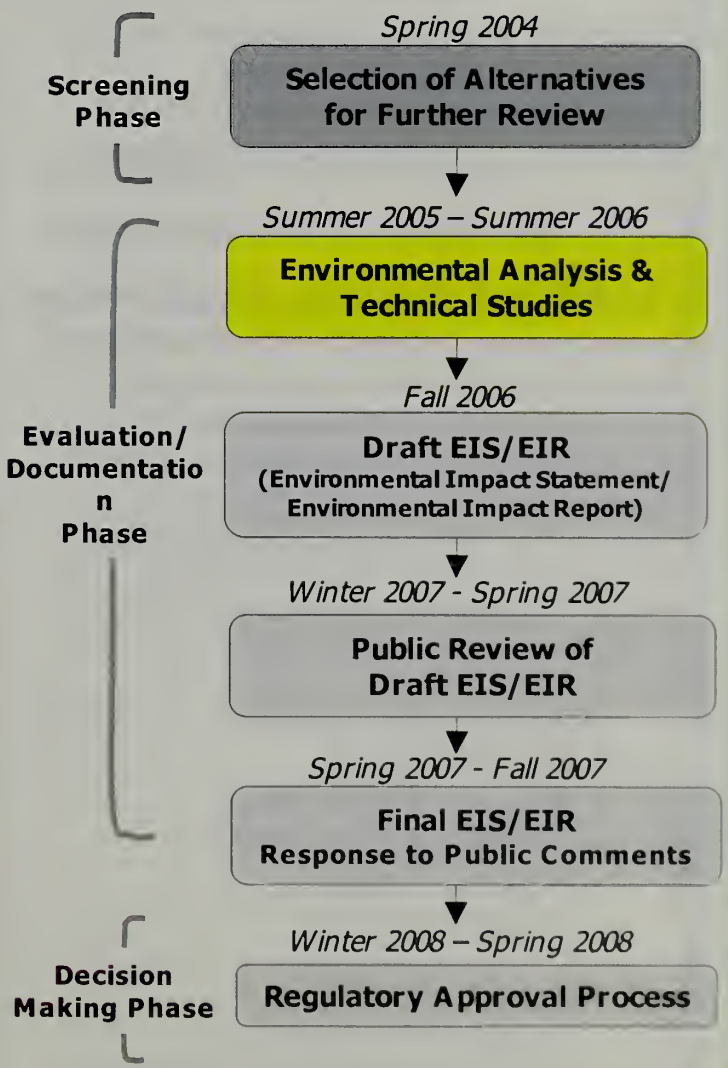
**Time: 5:30pm to 6:30pm**

**Agenda: See above**

*October 2005*

## Status Update

The Ad Hoc Community Advisory Committee met on August 29, 2005 to discuss the traffic studies being conducted for the environmental analysis. The environmental analysis, once completed, will incorporate results from the technical studies currently underway (see back for details). Three (3) southern and two (2) northern truck route alternatives, as well as the existing but unsigned truck route, will being evaluated in the environmental analysis.



Screening Phase
Spring 2004
Selection of Alternatives for Further Review
Summer 2005 – Summer 2006
Environmental Analysis & Technical Studies
Evaluation/ Documentation Phase
Fall 2006
Draft EIS/EIR (Environmental Impact Statement/ Environmental Impact Report)
Winter 2007 - Spring 2007
Public Review of Draft EIS/EIR
Spring 2007 - Fall 2007
Final EIS/EIR Response to Public Comments
Decision Making Phase
Winter 2008 – Spring 2008
Regulatory Approval Process

Bayview Transportation Improvements

# Project Overview

*October 2005*

## Project Purpose

The purpose of the Bayview Transportation Improvements Project is to:

- Reduce truck traffic on Third Street and residential streets, and

- Develop a more direct truck route between U.S. 101 and the existing industrial areas as well as to the north and south gates of the Hunters Point Shipyard.

## Technical Studies Underway

Several technical studies are underway for the Bayview Transportation Improvements Project. These technical studies are being conducted to analyze the potential impacts associated with the project. The results of these studies will be incorporated into the Draft Environmental Impact Statement (EIS)/Environmental Impact Report (EIR).

**Physical Environment**
- Air Quality Study
- Noise and Vibration Study
- Traffic/Transit Operations
- Floodplain Finding
- Hazardous Materials

**Natural Environment**
- Natural Environment Study
- Jurisdictional Wetlands Delineation
- Water Quality Study

**Cultural & Socioeconomic**
- Historic Properties
- Parklands (Section 4(f))
- Community Impact Assessment
- Land Use
- Growth Inducement
- Environmental Justice
- Draft Relocation Impact Report
- Visual Impact Assessment

## Meeting to Discuss Alternative S4 & Technical Study Updates

The San Francisco Department of Public Works in partnership with the San Francisco Planning Department invites you to attend the Ad Hoc Community Advisory Committee Meeting for the Bayview Transportation Improvements Project (BTIP) on **Tuesday, January 31** at 6:00pm.

The meeting will focus on Alternative S4, as well as the Hazardous Material Technical Study that will be included in the BTIP environmental analysis. Agenda items include:

- Status Update--Alternative S4
- Innes Avenue Improvements
- Next steps--incorporating results of technical studies in the environmental review

**Date: Tuesday, January 31, 2006**

**Location:**
**Southeast Community Facility**
Alex Pitcher Community Room,
1800 Oakdale Avenue,
San Francisco, CA

**Time: 6:00pm to 7:00pm**

**Agenda: See above**

## Alternative S4 Added

At the last Ad Hoc Community Advisory Committee Meeting on October 24, 2005, Committee Member Mike Hamman requested additional analysis on reducing the sharp turning angles associated with the proposed upland truck route alternatives. As a result of this request, Truck Route Concept S4 has been developed, and will be added to the alternatives being reviewed in the environmental analysis.

## Alternative S4 & Innes Avenue Improvements Discussed

At the January 31st Ad Hoc Community Advisory Committee Meeting Alternative S4 was reviewed and its route elements were described in detail. The project team identified a number of improvements related to this proposed concept:

- Fewer stops signs and better flow due to fewer sharp turns
- Creation of a landscaped street/visual aesthetics
- Creation of safe pedestrian sidewalks/crossings

Innes Avenue improvements (between Phelps and Earl Streets), and coordination efforts were also discussed at the meeting. Below is an overview of some of the proposed Innes Avenue improvements that were developed to provide visual streetscape features, smooth traffic flow and enhance bike/pedestrian safety:

- Truck traffic calming
- Pedestrian activated crossing signals
- New street landscaping and trees
- Added and widened sidewalks (on the south side of Innes Avenue)
- Painted bike lanes

## *ACCESSIBLE MEETING POLICY*

For additional information about Agenda items, please call the PAC office at 415-647-6857

1. Meetings are held in the Southeast Community Facility either in the Alex Pitcher Community Room or Conference Room 5 or at Earl P. Mills Auditorium or at the HERC Office located at 6301 Third Street, or at an alternative, accessible location in the Bayview Hunters Point Community in San Francisco. The rooms are wheelchair accessible and have accessible seating for persons with disabilities and those using wheelchairs.
2. The closest accessible BART station is 24th and Mission. Accessible Muni lines serving this location are: (a) #14 Mission, to the #44 O'Shaughnessy to Silver and Palou Avenues to the intersection of Palou Avenue and Phelps Street, then travel one block north to 1800 Oakdale Avenue (at Phelps Street); and (b) #15 Third Street to Oakdale Avenue and travel west two blocks to 1800 Oakdale Avenue. For additional information about Muni accessible services, call 415-923-6142.
3. There is accessible parking on the street. Public parking is not available in the Community Facility parking lot; please do not park in this lot.
4. The following services are available by calling 415-647-6857 at least 72 hours prior to the meeting: American Sign Language interpreters, use of a reader during a meeting, or a sound enhancement system. Following a meeting, minutes can be made available by tape or alternative formats.
5. In order to assist the PAC's efforts to accommodate persons with severe allergies, environmental illness, multiple chemical sensitivity or related disabilities, attendees at public meetings are reminded that other attendees may be sensitive to various chemical based products. Please help the PAC to accommodate these individuals.

## Previous Technical Studies Discussed

At the March 27 Ad Hoc Community Advisory Committee Meeting the project's parking assessment (part of the transportation technical studies) was presented. The project team shared the assessment process, goals and conclusions:

Goals
- No Net Parking Loss
- Provide new or additional parking on adjacent streets (replacement parking)
- Increased parking for each alternative
- Provide a variety of parking such as:
  - *Truck loading/unloading
  - *Business
  - *Residential

Process
- Determine existing parking supply and occupancy
- Identify parking loss and/or gain for each alternative
- Locate replacement parking for each alternative on new/existing streets
- Document information in Draft EIS/EIR

The project team concluded by stating that based on the parking assessment, it was determined that there was an overall increase in parking for all of the proposed northern and southern alternatives.

## Previous Meeting Summary *July 2006*

The project's hazardous materials assessment was presented at the April 24th Ad Hoc Community Advisory Committee Meeting. The project team described the reports' purpose, the approach to assessing the existing and future conditions, and the preliminary results.

The purpose of the hazardous materials study is to identify possible hazardous material locations and determine the potential for impacts during construction, as they relate to public health, and the environment. Additionally, performance measures are designed to reduce and/or eliminate potential impacts during construction by identifying the environmental screening levels that determine to proper treatment and/or reuse and removal and/or disposal of materials.

The process that was used for the study included reviewing historic land use records, past subsurface (underground) reports, regulatory agency files and conducting site reviews. The project approach seeks to identify areas of potentially hazardous materials that may be disturbed while constructing the alternatives. If potentially hazardous materials are anticipated, further testing will be conducted during the next phase of design for the preferred alternative to better determine the locations and/or levels of contamination. Prior to construction, a monitoring plan will be developed to ensure these materials are safely excavated and handled and are properly disposed.

The project team noted that excavation along the northern and southern alignments (northeast of Carroll Avenue) will possibly disturb hazardous materials and some of those materials will likely exceed regulatory limits and will need to be removed. Excavation along the southern alignments (southwest of Carroll Avenue) is not anticipated to disturb hazardous materials.

## Previous Meeting Summary

The At the July 31st Ad Hoc Community Advisory Committee Meeting, the project team presented preliminary information on the community impact assessment that has been conducted for the project. The purpose of this Community Impact Assessment is to provide an analysis of community impacts associated with a project, including circulation, community access, and environmental effects.

Technical studies, field visits, and demographic data were reviewed for the study, and community residents and organizations were interviewed. The project team shared the following preliminary information for each of the categories studied:

**Socioeconomics** —Generally, the alternatives yield positive benefits by improving access to employment centers, providing safer neighborhood environments through the use of traffic calming, and limiting land use conflicts. One possible negative impact would be the displacement of a small number of local businesses (in both the northern and southern alternatives).

**Community Access & Circulation** —Generally, the project yield positive benefits by providing improved truck access to employment centers, improving pedestrian access, adding safety enhancements such as new or widened sidewalks, and producing no net loss of parking within the project area.

**Environmental Effects** —The southern alternatives yield a slight increase in traffic noise, and the northern alternatives do not have any noise-related impacts. The southern alternatives show a slight increase in air quality impacts along the routes, and northern alternatives show a slight decrease in air quality impacts. All alternatives would require some soil excavation, with disposal-related risks increasing based on the amount of excavation.

## Previous Meeting Summary

At the September 30th Ad Hoc Community Advisory Committee meeting, the project team presented preliminary information on noise and air quality studies conducted for the project. The noise and air quality studies use models to predict future conditions and assess impacts associated with each of the project's proposed alternatives. The following is a summary of the information presented at the meeting.

**Noise Analysis**
The team identified sensitive receptors (residences, churches, schools, and parks), monitored and measured existing noise levels near these receptors, and estimated future noise levels. Predicted short- and long-term future noise levels were compared to federal and local standards, impacts were identified, and noise reduction measures were recommended. The southern alternatives would have the most impacts.

**Air Quality Analysis**
The team estimated potential short-term construction emissions and identified a list of feasible control measures to reduce construction dust and vehicle emissions. Long-term air quality effects were determined by reviewing historical data, identifying congested intersections, predicting future levels of traffic-generated pollutants, and identifying impacts. Project-related emissions are predicted to be well below established state air quality standards.

A diesel particulate matter health risk assessment was conducted to determine if the project would have adverse health effects on the community. Current diesel particulate exposures are high. Future exposure is expected to decrease significantly due to EPA-mandated improvements in vehicle emissions. The project would result in slightly higher exposures along the truck route than without the project; however, exposure would be reduced in residential areas.

A. Project Overview ..... Al Williams
B. Schedule Update & Current Activities ..... Peg Divine
C. Visual Assessment.....Thomas Trimbur and Mensah Webb
D. Questions/Answers (committee and public)
E. Committee Comments

III. **Public Comment on Non-Agenda Items (5 minutes)**
Comments on non-agenda items can be made at this time, but must be limited to two (2) minutes per speaker

IV. **Future Agenda Items (5 minutes)**
A. Date and Time
B. Agenda Topics

- Future Activities Related to the BTI Ad Hoc Community Advisory Committee

V. **Adjournment**

## *ACCESSIBLE MEETING POLICY*

For additional information about Agenda items, please call the PAC office at 415-647-6857

1. Meetings are held in the Southeast Community Facility either in the Alex Pitcher Community Room or Conference Room 5 or at Earl P. Mills Auditorium or at the HERC Office located at 6301 Third Street, or at an alternative, accessible location in the Bayview Hunters Point community in San Francisco. The rooms are wheelchair accessible and have accessible seating for persons with disabilities and those using wheelchairs.

2. The closest accessible BART station is 24th and Mission. Accessible Muni lines serving this location are: (a) #14 Mission, to the #44 O'Shaughnessy to Silver and Palou Avenues to the intersection of Palou Avenue and Phelps Street, then travel one block north to 1800 Oakdale Avenue (at Phelps Street); and (b) #15 Third Street to Oakdale Avenue and travel west two blocks to 1800 Oakdale Avenue. For additional information about Muni accessible services, call 415-923-6142.

3. There is accessible parking on the street. Public parking is not available in the Community Facility parking lot; please do not park in this lot.

4. The following services are available by calling 415-647-6857 at least 72 hours prior to the meeting: American Sign Language interpreters, use of a reader during a meeting, or a sound enhancement system. Following a meeting, minutes can be made available by tape or alternative formats.

5. In order to assist the PAC's efforts to accommodate persons with severe allergies, environmental illness, multiple chemical sensitivity or related disabilities, attendees at public meetings are reminded that other attendees may be sensitive to various chemical based products. Please help the PAC to accommodate these individuals.

# Meeting Notice:

## Ad Hoc Community Advisory Committee
## February 26, 2007

The San Francisco Department of Public Works and the San Francisco Planning Department invite you to attend the next Ad Hoc Community Advisory Committee Meeting for the:

## Bayview Transportation Improvements Project (BTI)

The meeting will focus on the project status, current work, and next steps including: refinement of technical studies, development and of the Draft EIS/EIR, and selection of the preferred alternative.

Agenda items include:

- **Project Overview**
- **Status, Current Work and Next Steps**
- **Questions and Answers**

**Date:** **Monday, February 26, 2007**

**Location:** **Southeast Community Facility**
Alex Pitcher Community Room
1800 Oakdale Avenue
San Francisco, CA

**Time:** **5:30pm to 6:00pm**

To request a translator for this meeting, please contact the project hotline number at: ***415-558-4350,*** or email the team at: *bvtransp@sfdpw.org*. We will respond within one to two business days.

**Previous Meeting Summary:**

The project team presented preliminary information on the visual assessment conducted for the project at the October 30, 2006 Ad Hoc Community Advisory Committee meeting.

The visual assessment examined existing conditions and future scenarios to assess what, if any, impacts would be associated with the project alternatives.

The team assessed the two northern and four southern alternatives using the following primary visual vantage points:

- **Bayview Hill**
- **Hunters Point Hill**
- **South Basin**
- **Hunters Point Boulevard**

The team identified several potential visual impacts, including:

- **Views of proposed bridges**
- **Introduction of new trees, streetlights, and sidewalks where none exist today**
- **New paving, striping, traffic signals and truck way-finding signs**

It was also noted that two interdepartmental task forces are working to develop traffic calming improvements for Innes Avenue and Hunters Point Boulevard and for Cargo Way. Status will be presented at the February meeting.

# Meeting Notice:

## Ad Hoc Community Advisory Committee
## April 30, 2007

The San Francisco Department of Public Works and the San Francisco Planning Department invites you to attend the next Ad Hoc Community Advisory Committee Meeting for the:

## Bayview Transportation Improvements Project (BTIP)

The meeting will focus on the Environmental Document approval process and proposed community outreach process. The schedule for the Draft EIS/EIR and identification of the preferred alternative will also be discussed. Please see the agenda for more detailed information.

*Main agenda items include:*

- **Project Overview**
- **Environmental Document Approval Process**
- **Proposed Community Outreach Process**
- **Questions/Answers**

**Date:** **Monday, April 30, 2007**

**Location:** **Southeast Community Facility**

**Previous Meeting Summary:**

The February 26, 2007 Ad Hoc Community Advisory Committee included an update on overall project and activities undertaken since the last meeting held on October 30, 2006. Al Williams explained that the BTIP has been coordinating with the Mayor's Office to integrate the planning process that merges the Hunters Point Shipyard and the Candlestick Stadium development areas.

***Mayor's Office Coordination and Vision***
Tiffany Bohee, Mayor's Office representative, has met with community stakeholders, city departments and BTIP team members to develop an area wide approach that combines the planning efforts and coordinates the land use, traffic capacity, agency coordination, jobs/training, and neighborhood concerns. The coordinated planning efforts will ensure that the transportation plan accommodates the traffic needs identified in the integrated planning process.

***Cargo Way Streetscape Plan – Update***
Tom Evans, San Francisco Redevelopment Agency (SFRA) representative, presented a status report on the Cargo Way Streetscape Plan that started last month. A project kick off meeting was held to present existing Cargo Way planning information, coordinate with other City agencies, and to integrate current/related projects. SFRA will work with Robin Chiang and Associates to conduct a community design and public involvement process.

# Meeting Notice:

## Ad Hoc Advisory Committee
## July 30, 2007

## Meeting to Discuss Updated Alternatives Evaluation Criteria

The San Francisco Department of Public Works in partnership with the San Francisco Planning Department invites you to attend the Ad Hoc Community Advisory Committee Meeting for the Bayview Transportation Improvements Project (BTIP) on Monday, July 30 at 5:30pm.

The meeting will focus on the project's updated alternatives evaluation criteria that will be used to choose a preferred alternative. Agenda items include:

- **Project Overview**
  - **Alternatives Description**
  - **Public Process**
  - **Current Status**
- **Previous Alternatives**
  - **Selection Criteria**
- **Recommended Alternatives**
  - **Evaluation Criteria**

**Date:**
**Monday, July 30, 2007**

**Location:**
**Southeast Community Facility**
**Earl P. Mills Room**
**100 Whitney Young Circle**
**San Francisco, CA**
**ROOM CHANGE FOR THIS MEETING ONLY**

**Time:**
**5:30pm to 6:00pm**

## Previous Meeting Summary

An overview of the Environmental Impact Statement/Report (EIS/R) approval process as well as the community outreach process was presented at the April 30th Ad Hoc Advisory Committee (AAC) Meeting.

The project team described previous outreach efforts, including scoping meetings, criteria selection workshops and multiple AAC meetings. The next step in the community outreach process is to meet with 40 additional stakeholder/ community groups. Since Bayview Hunters Point is an environmental justice area, the San Francisco Department of Public Works (SFDPW) has made special efforts to go to community group meetings to inform them of the project.

The Draft EIS/R for the Bayview Transportation Improvement Project will be submitted in September 2007 for agency reviews and will be published in early February 2008. Public review of the document will be open for 45 days. In order for the public to comment on the Draft EIS/R, one set of two community workshops and one set of two public hearings will be held. Future AAC meeting topics include a review of the Draft EIR/S, a review of public workshop comments, and determination of a locally preferred alternative. These meetings are planned to take place early in 2008.

The Board of Supervisors will ultimately make a decision on the locally preferred alternative, with the benefit of the AAC's recommendation, community comments, and the project team's analysis. SFDPW is working toward selection of the locally preferred alternative by the Board of Supervisors in May 2008, followed by the publication of the Final EIS/R in July 2008.
